

Julia Patterson

+1 6134848669 | julia.patterson@mail.mcgill.ca | linkedin.com/in/juliapatterson/
julia-patterson.com | BAsC Honours Chemical Engineering | M.Eng candidate

SKILLS

Scientific and policy research and analysis, technical writing, organizational skills, systems mapping, project management, Python, AspenPlus, P&IDs, process design, 3D modelling, AutoCAD, experimental design, LaTeX, MS Office, MS Excel VBA, Spanish B1, German A2

EXPERIENCE

Circular Economy Research Intern

Circular Innovation Lab

Mar 2026 - present

Copenhagen, Denmark – Remote

- Support research and development of UNEP knowledge products focused on eliminating hazardous chemicals from textile and construction supply chains, through project management, literature reviews, and concept notes for internal and external capacity building
- Jointly oversee advisory group communications through coordination of experts across several sectors, including academia, financial, and international organizations

Backend Operations Manager

Ravens Rest Retreat

July 2025 - present

Moose Brook, NS – Remote

- Increase efficiency of financial reporting and management by 300%, replacing manual input with MS Excel and the use of VBA
- Designed hour/payroll tracking system using Google Sheets and Google Apps Script for calendar integration

Research Intern

Emnandi Bioplastics × ASTUTE Centre of Excellence

Jan 2024 - June 2024

Swansea, Wales

- Conducted 50+ annealed polymer ageing tests such as DSC, MFI, tensile tests, and impact tests on recycled polymers to determine mechanical properties and reprocessability for automotive applications
- Performed a comprehensive literature review on PLA and recycled PLA properties, supporting innovative projects and advancing understanding in the field

Geotechnical Engineering Research Assistant

Hamburg University of Technology

May 2023 - Dec 2023

Hamburg, Germany

- Based on conducted literature review, designed experimental test parameters and conducted 150+ geotechnical laboratory tests to deduce the effects of salinity on clay and the adhesion properties in geotechnical engineering applications such as tunnelling
- Assessed experimental results from multiple softwares and LiDAR point clouds using Python

Project Engineering Co-op Student

Zeton Inc.

Sept 2022 - Dec 2022

Burlington, ON

- Identified and inspected 250+ instruments, valves, and equipment using P&IDs and 3D models and VBA for automation to significantly reduce labour time
- Coordinated with multiple vendors and created purchase orders and BOMs using Microsoft Dynamics ensuring correct and efficient delivery

Engineering Co-op Student

Environment and Climate Change Canada

Jan 2022 - Apr 2022

Gatineau, QC

- Utilized technical writing skills to prepare 10+ internal guidance documents and SOPs for implementation of the QA program, including verification and validation of the Clean Fuel Regulations
- Created several detailed presentations to successfully explain the complexity of the regulations to stakeholders

Student Research Assistant

SNOLAB - SNO+ Experiment

May 2021 - Aug 2021

Sudbury, ON

- Aided in administering controls testing for the commissioning of 2 underground chemical plants ensuring the project stayed on schedule
- Collaborated with R&D team conducting QA testing and assisting isolation of an impurity in one of the chemical compounds

PROJECTS

Solar Desalination | Mechanical design, AutoDesk Fusion 360, Systems mapping

University of Waterloo, Fourth Year design project

June 2024 - March 2025

Waterloo, ON

- Mechanical and materials co-lead in the development and design of a novel modular scale solar still for residents of Bangladesh
- Administrative and organizational lead regarding budgeting and BOM, scheduling of meetings, and overall communication with advisors
- Competed in campus finals of Map the System Canada, placing top 5 of 45 applicants

EDUCATION

Candidate for Master of Engineering: Sustainability in Engineering and Design

McGill University

Sept 2026 - Dec 2027

Montreal, QC

- J.M. Bishop and Family TISED Fellowship recipient for 2026-2027 academic year based on academic merit

Bachelor of Applied Science Honours (Distinction) in Chemical Engineering

University of Waterloo

Sept 2020 - Apr 2025

Waterloo, ON

- Keith Carr Memorial Award recipient 2023 for leadership in the university and community
- Engineering Society President's Award recipient Fall 2021, Spring 2022 for valuable assistance to the activities of the Society

Chemical engineering exchange student

Swansea University

Jan 2024 - June 2024

Wales, United Kingdom

- Tree planting society, mountaineering and climbing society, windsurfing society, hiking society, stand-up paddleboard society
